PROFILE

As a Technical Lead, I excel in crafting dynamic, responsive user interfaces, collaborating with stakeholders to define project requirements aligned with business goals. I meticulously manage project timelines, delegate tasks for timely milestone, offer technical guidance, mentorship for team growth, and uphold high-quality code standards through reviews and best practices implementation.

WORK EXPERIENCE

Feb'22 – Present
HCL Tech | **Client** - NatWest Group

Technical Lead

Led a team in developing a Generative AI chatbot for improved customer experience, supporting multiple brands and ensuring accessibility. Implemented efficient customer journeys, including Agent Handoff and Tab2call, while also overseeing project timelines, providing technical guidance, and maintaining code quality through reviews and best practices.

June'20 – Feb'22
Innova Solutions | **Client** - Change healthcare

Sr. Software Engineer

Developing an internal application for Change HealthCare with AVUD operations on grid records, allowing users to sort, filter, update, delete, search, and receive alert notifications, in collaboration with business users for enhanced user experience.

May'19 – May'20
Hexaware Technologies | **Client** - Inchcape shipping services

Sr. Software Engineer

Inchcape app development with global port connectivity, AVUD operations, pagination, grids, custom components, typeahead, code migration, login, and Redux Saga integration for data retrieval from Rest API and Drupal.

July'18 – May'19
Cognizant Technology Solutions | **Client** - Verizon

Associate

Created a Verizon One Search app with React and Redux, featuring search, filters, and typeahead. Implemented a Micro-Frontend Tabbed Approach, seamlessly integrating Angular and React for wired/wireless navigation without page refresh.

Dec'14 – July'18
Namecheap Web Services Pvt Ltd | **Client** - Namecheap

Software Engineer

Developed Account Panel Redesign, implementing domain selection and AngularJS modal prompt. In Symantec Sunset, managed alerts, SSL certificates post-sunset, and ReactJS bulk domain handling with Redux and eligibility checks.
